CROWNFI

THE ULTIMATE BLOCKCHAIN-POWERED
PLATFORM FOR PAGEANTS

Introduction

- A market of over **40 million active pageant fans** across Southeast Asia, with the Philippines at its heart.
- The Philippines is widely recognized as **Asia's pageant powerhouse**, producing 16 Big Four international titleholders
- The global pageant industry is a **multi-million-dollar ecosystem** fueled by fan voting, ticket sales, sponsorships, and merchandise.

Mission

To build the ultimate blockchain platform for pageantry, onboarding millions of pageant fans to blockchain while empowering the next generation of kings and queens.

To revolutionize the pageant industry with blockchain by making voting, ticketing, and fundraising secure, transparent, and accessible.

Problems

Voting System Failures

- During major international pageants, official voting platforms become slow, unresponsive, or crash due to overwhelming traffic.
- Existing pageant platforms struggle to handle millions of simultaneous users during voting and ticket sales.

Limited Fundraising Opportunities

- Candidates often rely on sponsors, donations, or personal funds with few sustainable ways to raise money.

Unfair Ticket Scalping

- Tickets sell out within minutes as scalpers use automated methods or bulk purchases to hoard tickets and resell them at inflated prices.

Untapped Value of Digital Content

- Beauty queens invest heavily in professional photoshoots for branding and promotions, but most images lose value after the competition.

Solution

01.

Blockchain-powered infrastructure designed to handle millions of fans with secure, transparent, and reliable voting, minimizing downtime during peak demand.

02.

Secure **Blockchain-powered digital tickets** help prevent ticket scalping. Each ticket is uniquely verifiable, making counterfeiting difficult and enabling organizers to control transfers or cap resale prices. This ensures fans have fair access to tickets at reasonable prices.

Solution

03. **NFT-like digital collectibles** allow candidates to monetize their official portraits, providing sustainable funding for their pageant journey and advocacies.

04. Empower candidates with **decentralized fundraising**, giving fans a fast, transparent, and borderless way to contribute using cryptocurrency.

Target Users/ Audience

- Local and International Pageants

Target Users/ Audience

1. Female Beauty Pageants
2. Festival Queen Competitions
3. University Pageants
4. Male Beauty Pageants
5. Transgender Beauty Pageants
6. Gay Men & Drag Competitions
7. Kids Beauty Pageants
8. Dog shows

Target Users/ Audience

- Millions of Pageant fans, attendees and voters
- Pageant Contestants
- Pageant Owners and Organizers
- Sponsors and Partners
- Judges, Tabulators, and auditors

Future Plans

- Merchs & Memorabilia
- Anniversary NFTs
- VIP Passes
- Fans Club Awards
- Meet-ups / IRL Events with the Queens
- TCG Collection
- Prediction Market
- Pageant Sponsorships
- Miss Crypto 2027 / Miss Bitcoin 2027

Goal

- Onboard the next million pageant fans on the Stellar Blockchain
- Increase Liquidity during pageants

CrownFi Logo

Branding / Color Pallette

The background features a complex, abstract design of overlapping, wavy lines in various shades of light blue and grey. Two gold-colored ribbons are positioned in the corners, one in the top-left and one in the bottom-right, both appearing to flow and curve. The word "Roles" is centered in a gold-colored serif font.
